LIGHT WEIGHT

NO TIMBER CONSTRUCTION
All of our campers are made from high grade alloy, high molecular weight thermoplastic, marine-grade stainless steel and hot dipped galvanised steel giving higher strength-to-weight and maximum weather resistance.

STRONGER. LIGHTER. TOUGHER.
Computer Aided Design (CAD) guides our laser cutters to produce our unique interlocking tabs joinery system adding strength whilst removing weight.

LIGHT WEIGHT BREATHABLE CANVAS
We save 33% off the weight of our canvas panels by choosing Australian-made 'Dyna-Proof' breathable canvas. Ultra-durable, lightweight, ready for the harshest of outdoors conditions.

LITHIUM BATTERY TECHNOLOGY
We use only lithium batteries which are 75% lighter and more durable than AGM lead acid equivalents. Allows you to go further off-grid, for longer, but still in touch and in comfort.

WIRING LOOMS & HARNESSSES
CAN Bus systems for all looms and harnesses, reducing overall wiring weight by around 8kgs and ensuring connections stay strong for off-road conditions.

WATERLESS TOILET
8kgs maximum weight. Saves 110kgs weight over maceration toilet.

VALUABLE WATER

WATER 3 WAYS
Twin tanks, single filler, marine pumps, plus front stored Jerry cans give you greatest flexibility and capacity.

STRAIGHT FROM STREAM
With our innovative visi-flow special option, bypass the water tanks and pump directly from any water source. Hot water system uses heat exchanger allowing for varying water temperatures.

WATERLESS TOILET
No heavy blackwater to carry, no freshwater to keep in reserve. No fresh water supply needed.
